* Means of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period
The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10
rainfal the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station
district, i.e., from total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one of

for the week ending Saturday, the 23rd of December 1893.

Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Of week. Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Rainfall. Since 1st of month. Mean for district.	Normal mean.	Variation.	Since 16th October 1893. Mean for district.	Normal mean.	Variation.	District.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 1·0 inch of rain has fallen.

CALCUTTA, *the 26th December* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY THE 23RD OF DECEMBER 1893.

THE meteorology of the week under review has again been of little importance, and calls for no detailed review, for conditions have been of fine settled north-east monsoon character throughout the period. On the 17th of December, or the first day of the week, pressure was decidedly high, and was above the normal by amounts ranging from 0·04 inch at the southern and south-eastern stations to 0·06 inch and 0·07 inch in the north and west of the province. The differences of pressure were hence a little larger than usual, and the northerly winds which were blowing were fairly strong. The mean temperature was in defect of the normal at almost all stations in the province, the usual defect equalling from 1° to 2°. Skies were almost cloudless throughout the province, and no rain was reported. The changes of temperature and pressure from day to day during the week have been small, and their general effect has been to make temperature somewhat higher and pressure somewhat lower than at its commencement. Indeed, on the 22nd and 23rd, the mean temperature had become in slight excess of the normal, while on the 23rd pressure was almost normal over the province. Throughout the whole week, however, a steady northerly wind current has been blowing, skies have been almost cloudless, and no rain has been reported from any station in the province.

Pressure.—The mean pressure for the week has hence been in small excess, and this excess has been largest at the northern and western stations, and smallest at the southern and south-eastern stations. Thus excess pressures of about 0·05 inch and 0·06 inch have been registered at many stations in North Bengal and at some in Bihar, while at Calcutta the excess has equalled 0·028 inch, at Gopalpur 0·024 inch, and at Chittagong 0·033 inch. The general excess for the whole province has equalled about 0·04 inch.

Temperature—Was in small defect for all except the last few days of the week, when slight excess amounts were recorded. The variation of the mean temperature of the week from the normal has therefore been small, and for the whole province the average defect only equals about a fifth of a degree, while the main defect has been confined to South-West and North Bengal, where the defect has been more than half a degree. On the other hand, slight excess average temperatures for the week have been recorded in South Bihar and East Bengal.

The actual temperatures registered during the week and their variations from the usual temperature for the present season are most clearly seen in the table below, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period. The variations it will be seen have been small in both the night and day temperatures.

Table showing the excess or defect of the actual mean temperature from the normal for the week ending Saturday, the 23rd of December 1893.

	Normal mean maximum temperature for the week ending 23rd December.	Actual mean maximum temperature for the week ending 23rd December 1893.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 23rd December.	Actual mean minimum temperature for the week ending 23rd December 1893.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 23rd December.	Actual mean daily temperature for the week ending 23rd December 1893.	Variation of actual mean from the normal.

The total fall of rain from 17th to 23rd December 1893	Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office	Nil
The total fall from 1st January to 23rd December 1893	85·23
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65·23

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew; ≡, fog.

H. STUART,
Examiner of Accounts.

CALCUTTA, *the 20th December* 1893.

Statement of principal commodities carried on the Eastern Bengal State Railway during the month of September 1893.

INCREASES.

	Tons.
Coal and coke ...	21,819

Due to large despatches of coal for the public to Shamnagar, Kamkinara, Damookdia-ghat, Goalundo, Kooshtea, Jalpaiguri and stations on the Bengal Central Railway.

	Tons.
Cotton, manufactured ...	2,872

Due to despatches from Calcutta for the poojah sales. Shamnagar shows a small increase in despatches of bales of cotton-yarn.

	Tons.
Grain and pulses ...	17,583

The increase is chiefly in despatches from Armenian-ghat, Chitpur, Ruthtolla and stations on the Northern section to the eastern districts. The crops in these districts suffered from flood.

	Tons.
Gunny-bags and cloth ...	7,866

Jalpaiguri shows increases under this head.

	Tons.
Oils ...	2,610

Partly due to prohibition of carriage by boat of kerosine-oil within certain limits of the port of Calcutta and partly to extension of bulk oil traffic.

DECREASES.

	Tons.
Jute, raw ...	12,591

Atrai, Kooshtea, Pangsa and Goalundo show large decreases under this head.

	Tons.
Railway plant and rolling-stock ...	8,168

Due to completion of works on the Barsoe-Kissengunge branch and the C. B. S. Railway.

P. D. BARCLAY,
Traffic Superintendent.

The 19th December 1893.

NOTICES TO MARINERS.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 159.

[First Publication.]

CHINA—PE CHILI STRAIT—MIAU TAU ISLANDS.

Dangerous sunken rock eastward of Toki Tau.

THE British Admiralty has given notice (No. 262 of 1893) of the existence of a dangerous sunken rock, named *Tsen leang shu*, about 30 yards in extent, with about 12 feet on it at low water, lying in the fairway among Miau tau islands, with the centre of Sha mo tau in line with Siau chu shan summit, bearing S. 11° E., and Toki tau peak (613 feet) N. 63° W., distant 3 miles.

Close around Tsen leang shu there are depths of 8 fathoms, rocky ground, and beyond, 12 to 14 fathoms over hard mud; the state of the sea and a breaking tide rip prevented the least water on it being obtained. The fisherman on Toki tau state that it is a small pinnacle rock, with not more than 12 feet on it at low water, and from appearances this statement is considered trustworthy.

Approximate position, lat. 38° 9′ N., long. 120° 50′ E.

NOTICE TO MARINERS—No. 160.

[First Publication.]

NEW ZEALAND, SOUTH ISLAND—CHETWADE ISLANDS.

Sunken rocks westward of Kakaho islands.

THE British Admiralty has given notice (No. 273 of 1893) of the existence of a cluster of sunken rocks (*Hinemoa rocks*), extending about 130 yards in a north and south direction, with a breadth of 33 yards, lying with the north-west extreme of Kakaho island, bearing N.E. ¾ E., distant 8¼ cables, and the east extreme of Jag rocks N. by W. ½ W. On the north end of the cluster there is a depth of 9 feet (with 17 fathoms close northward), and on the south end 2 feet at low water.

Approximate position, lat. 40° 54′ S., long. 174° 4′ 50″ E.

(*Variation* 15° *Easterly in* 1893.)

NOTICE TO MARINERS—No. 161.

[First Publication.]

EASTERN ARCHIPELAGO—SUMATRA, NORTH COAST.

Sunken reefs, W.-N. Westward of "Diamant Punt."

THE following Notice to Mariners, issued by the Vice-Admiral Commanding the Naval forces in Neth: India, No. 14, dated 1st June 1893, is republished for general information:—

The Commander of H. N. M. *Batavia* reports the existence of the following two coral reefs W.-N.-W. of "*Diamant Punt*"—

1. A coral patch (*Karang Minja*), about 55 yards long in a N.-N.-W. and S.-S.-E. direction, with 6 to 9 fathoms on in at low-water spring tides and 20 fathoms close around, lies with "*Diamant Punt*," bearing S. 70° E., and the trees of *Pidada* S. 5° W.

Approximate position, lat. 5° 18′ 2″ N., long. 97° 23′ 5″ E.

2. A coral patch (*Karang Tenga*) with a least depth of 3 fathoms at low water spring-tides, lies with *Diamant Punt*, bearing S. 77° E. and the trees of *Pidada* S. 15° W.

Approximate position lat. 5° 17′ 2″ N., long. 97° 24′ 4″ E.

Under favourable circumstances the position of these reefs is indicated by ripples and a discoloration of the water.

Bearings true.

Note.—The fishermen of the locality say that there are still three sunken reefs close to *Karang Tenga*. The examination is therefore continued.

This notice affects the charts: Nederlaudsch-Oost-Indie, blad 1, 1867; Noordelijk gedeelte Sumatra, 1881: Noordkust Sumatra, Batoe Poetih tot Diamant Punt, 1889, and Noordoostkust Sumatra, Diamant Punt tot hoek Tamiang, 1889.

AUSTRALIA—Brisbane river.

Tide signals at Pile light-house.

The Portmaster, Brisbane, has given notice (No. 19 of 1893) that on and after Wednesday, 17th May, the original Code of Tide Signals at the Pile Light-house, as contained in the Local Harbour Regulations, will be restored, replacing the one now in use there.

The depth shown by the original code is the tidal rise added to 14 feet, and that depth now exists between the Bay and the Powder Magazine. From the latter point upwards the available depth is 5 feet 6 inches less than the above.

It is anticipated that by the end of June navigation will be completely restored, and that there will be a depth of 14 feet of water available, in addition to the tidal rise, as far as the Town Reach.

Dassen Island light.

THE following Notice to Mariners (No. 410, dated 18th April 1893), issued by the Assistant Commissioner, Cape of Good Hope, South Africa, is republished for general information:—

It is hereby notified that, in accordance with Notices to Mariners, dated respectively the 30th July 1891 and 9th March 1893, a Double Flashing Half Minute White Light of the First Order was exhibited from the new light-house on Dassen Island on the 15th April 1893, and will continue to be shown hereafter. The duration of the Flashes and Eclipses is approximately as follows:—

Flash	... ...	3 seconds.
Eclipse	... ...	4 „
Flash	... ...	3 „
Eclipse	... ...	20 „
	Total ...	30 seconds = ½ minute.

The light has an elevation of 155 feet above high-water level, ordinary spring tides, and is visible in clear weather at a distance of 18½ nautical miles from the light-house.

Dassen Island lies about 4¾ miles off the south-west coast of Cape Colony, in latitude 33° 26′ south and longitude 18° 5¼ east, and it is distant from Cape Town about 33 nautical miles.

Sunken reefs, W.-N. Westward of "Diamant Punt."

THE following Notice to Mariners, issued by the Vice-Admiral Commanding the Naval forces in Neth: India, No. 14, dated 1st June 1893, is republished for general information:—

The Commander of H. N. M. *Batavia* reports the existence of the following two coral reefs W.-N.-W. of "*Diamant Punt*"—

1. A coral patch (*Karang Minja*), about 55 yards long in a N.-N.-W. and S.-S.-E. direction, with 6 to 9 fathoms on in at low-water spring tides and 20 fathoms close around, lies with "*Diamant Punt*," bearing S. 70° E., and the trees of *Pidada* S. 5° W.

Approximate position, lat. 5° 18′ 2″ N., long. 97° 23′ 5″ E.

2. A coral patch (*Karang Tenga*) with a least depth of 3 fathoms at low water spring-tides, lies with *Diamant Punt*, bearing S. 77° E. and the trees of *Pidada* S. 15° W.

Approximate position lat. 5° 17′ 2″ N., long. 97° 24′ 4″ E.

Under favourable circumstances the position of these reefs is indicated by ripples and a discoloration of the water.

Bearings true.

Note.—The fishermen of the locality say that there are still three sunken reefs close to *Karang Tenga*. The examination is therefore continued.

This notice affects the charts: Nederlandsch-Oost-Indie, blad 1, 1867; Noordelijk gedeelte Sumatra, 1881: Noordkust Sumatra, Batoe Poetih tot Diamant Punt, 1889, and Noordoostkust Sumatra, Diamant Punt tot hoek Tamiang, 1889.

AUSTRALIA—BRISBANE RIVER.

Tide signals at Pile light-house.

THE Portmaster, Brisbane, has given notice (No. 19 of 1893) that on and after Wednesday, 17th May, the original Code of Tide Signals at the Pile Light-house, as contained in the Local Harbour Regulations, will be restored, replacing the one now in use there.

The depth shown by the original code is the tidal rise added to 14 feet, and that depth now exists between the Bay and the Powder Magazine. From the latter point upwards the available depth is 5 feet 6 inches less than the above.

It is anticipated that by the end of June navigation will be completely restored, and that there will be a depth of 14 feet of water available, in addition to the tidal rise, as far as the Town Reach.

SOUTH AFRICA—WEST COAST—CAPE OF GOOD HOPE.

Dassen Island light.

THE following Notice to Mariners (No. 410, dated 18th April 1893), issued by the Assistant Commissioner, Cape of Good Hope, South Africa, is republished for general information:—

It is hereby notified that, in accordance with Notices to Mariners, dated respectively the 30th July 1891 and 9th March 1893, a Double Flashing Half Minute White Light of the First Order was exhibited from the new light-house on Dassen Island on the 15th April 1893, and will continue to be shown hereafter. The duration of the Flashes and Eclipses is approximately as follows:—

Flash	3 seconds.
Eclipse	4 „
Flash	3 „
Eclipse	20 „
Total ...	30 seconds = ½ minute.

The light has an elevation of 155 feet above high-water level, ordinary spring tides, and is visible in clear weather at a distance of 18½ nautical miles from the light-house.

Dassen Island lies about 4⅝ miles off the south-west coast of Cape Colony, in latitude 33° 26′ south and longitude 18° 5¼ east, and it is distant from Cape Town about 33 nautical miles.

EASTERN ARCHIPELAGO—NATOENA ISLANDS.

Sunken rock off south-east coast of North Natoena island.

THE following Notice to Mariners issued by the Vice-Admiral Commanding the Naval Forces in Neth. India, No. 15, dated Batavia, 8th June 1893, is republished for general information :—

The Commander of the U. S. S. *Marion* reports that the American ship *Robert L. Belknap* was wrecked on an uncharted rock to the southward and eastward of *North Natoena* island, *China Sea.*

The rock is a pinnacle rock, with 17 feet of water on it.

The ship was aground forward and had 6 fathoms of water amidships and under her stern.

The rock lies on the following approximate bearings :—

Setokong island (summit ?)	... ...	N. 9° W.
Semione island (summit ?)	... ...	S. 70° 30′ W.

Also, that breakers extend about 3 miles seaward from the south-east shore of *North Natoena* island.

Bearings true.

(*See Notice to Mariners No.* 16/337, *Washington*, 1893.)

(*Note.*—It seems possible, that this is the reef named "*Batoe Penoeh.*"

(See Notice to Mariners No. 20, Batavia, 1892.)

This notice affects the charts: Nederlandsch Oost-Indië, blad II, 1867, and Zuidelijk gedeelte Chineesche Zee, blad II, 1886.

British North Borneo.—Sunken reef off Usakan island.

Information has been received of the existence of a shoal, about 3 cables in length, with a depth of 4 fathoms, except in one place where pinnacle rock exists with 11 feet of water at lowwater springtides, lying with

Usakan island bearing ... ... S. 25° W., distant 3½ miles
and *Nob* island ... ... N. 6° E.

Approx. position, lat. 6° 26′ 30″ N., long. 116° 17′ 45″ E.

Bearings magnetic.

(*See Str. Settl. Gov. Gazette No.* 22, 1893.)

British Nort Borneo.—Mallawalleé channel.

Sandy island beacon disappeared.

Information has been received that the beacon on *Sandy* island, south-east entrance to *Mallawalleé* channel, has disappeared.

Approx. position of site, lat. 6° 49′ 30″ N., long. 117° 37′ E.

(*See Notice to Mariners No.* 198, *London*, 1893.)

Strait Settlements.—Singapore—Submarine mining grounds.

From 26th May 1893, and until further notice, submarine mining grounds will be set apart, for the Royal Engineers, for training purposes.

1. On the South-West coast of *Blakang Mati* island, bounded as follows:—

On the North-West by a line from *Rimau-point* extending 1,000 yards to the South-West and there marked by a red spherical steel buoy. On the South-West by a line drawn from the abovementioned buoy to another red spherical steel buoy 2,000 yards due South of *Rimau-point*. On the South-East by a line drawn from the lastmentioned buoy North-East to *Blakang Mati* island. On the North-East by a portion of *Blakang Mati* island.

2. A rectangular area extending about 200 yards to the Eastward of the black beacon on the Northern extremity of *Buran Darat* coral reefs and 300 yards to the Northward of the reefs.

Pilots and Masters of vessels are warned not to anchor in these spaces and that dummy mines and floating obstructions may be met when navigating therein.

(*See Str. Settl. Gov. Gazette No.* 22, 1893.)

AUSTRALIA—Torres strait—inner route.

Reported dangers—Princess Charlotte bay.

The Portmaster, Brisbane, has given notice (No. 20 of 1893) of the existence of two dangers in the following positions, viz.—

A reef about ¼ mile in extent with a depth of 3 fathoms on it.
Bay Hill in line with Bathurst Head, bearing ... ... E. ½ S.
And d reef bearing ... ... N.E.

A reef of small extent, with two pinnacles, on which there is 3½ fathoms at low-water, lying about W. ½ N. 3½ miles from the beacon on d reef.

The first-named danger lies on the recommended night course, off Princess Charlotte bay, and the latter one on or near to the usual day course. Mariners are therefore cautioned to exercise great care in that vicinity.

CHINA SEA—Natuna island.

Reefs and wrecks near Pulo Laut.

Notice to Mariners No. 306 of 1893 issued by the British Admiralty is republished:—

The following information concerning certain reefs and wrecks near Pulo Laut, or North Natuna island, has been received from H.M.S. *Archer*, dated 3rd May 1893:—

1. Reefs which usually break at half tide, and which dry in places at low water spring tides, fringe the south-east coast of Pulo Laut for a distance of about 4 miles. The soundings for about one mile south-east of the outer edge of the reefs are 8 to 13 fathoms over uneven ground, thence depths of 18 to 20 fathoms, sand and coral bottom, were obtained till nearing Batu Penuh.

2. The wreck of the Swedish barque *Doris* lies on the abovementioned reef in about one foot at low water, with the east extreme of Sto Kong islet bearing N. ⅛ E., and the south-east extreme of Pulo Laut W. by N., distant about 3¼ miles. Approximate position, lat. 4° 41′ N., long. 108° 2′ E.

3. Batu Penuh, shown with 5¾ fathoms water on it, is an extensive shoal, composed of coral and white sand. A depth of 3¾ fathoms (at about low water) were obtained with the south-east extreme of Pulo Laut bearing W.N.W., distant 8¾ miles. Approximate position lat. 4° 38½′ N., long. 108° 6½′ E. Belknap rock, on which the American ship, *Robert L. Belknap*, was wrecked, forms a part of the abovementioned shoal. (*See* Notice to Mariners, No. 230 of 1893.)

4. The cylinders of a steamer with two piston rods on Gloria shoal uncover at low water, and resemble a rock awash.

Approximate position, lat. 4° 36′ N., long. 107° 59′ E.

CAUTION.—The waters surrounding this group are most imperfectly known.

SOUTH AFRICA—WEST COAST—CAPE OF GOOD HOPE.

Dassen Island light.

THE following Notice to Mariners (No. 410, dated 18th April 1893), issued by the Assistant Commissioner, Cape of Good Hope, South Africa, is republished for general information:—

It is hereby notified that, in accordance with Notices to Mariners, dated respectively the 30th July 1891 and 9th March 1893, a Double Flashing Half Minute White Light of the First Order was exhibited from the new light-house on Dassen Island on the 15th April 1893, and will continue to be shown hereafter. The duration of the Flashes and Eclipses is approximately as follows:—

Flash	3 seconds.
Eclipse	4 "
Flash	3 "
Eclipse	20 "
Total ...	30 seconds = ½ minute.

The light has an elevation of 155 feet above high-water level, ordinary spring tides, and is visible in clear weather at a distance of 18½ nautical miles from the light-house.

Dassen Island lies about 4¾ miles off the south-west coast of Cape Colony, in latitude 33° 26′ south and longitude 18° 5¼ east, and it is distant from Cape Town about 33 nautical miles.

EASTERN ARCHIPELAGO—SINGAPORE OLD STRAIT.

Spit southward of Pulo Ubin, Serangong harbour.

THE following Notice to Mariners, issued by the Vice-Admiral Commanding the Naval Forces in Neth. India, No. 19, dated Batavia, the 4th July 1893, is republished for general information:—

Information has been received from H. M. S. *Pallas* that a mud spit, with less than 2 fathoms water on it, extends in a south-east direction from the south extreme of *Pulo Ubin*, northside of *Serangong* harbour. From the outer end of the spit, the largest (south-west) of the *Batu Puleh* rocks bears S. E. by E. $\frac{1}{2}$ E., distant about 6 cables.

Approximate position, lat. 1° 24′ N., long. 103° 57′ 55″ E.

Note.—It is also stated that *Serangong* harbour and approaches have shoaled considerably.

(*Variation 2° Easterly.*)

CHINA, EAST COAST—PUTOY GROUP—HONGKONG APPROACH.

Double flashing light and fog guns on Wag lan islet.

WITH reference to Notice to Mariners, No. 108, dated 1st May 1893, issued by this office, the British Admiralty has given further notice, that on 9th May 1893, a light was exhibited from the light-house recently erected on Wag lan islet, Putoy group, western side of approach to Hongkong by the Tathong channel:—

Wag lan islet light is a *double flashing white* light (dioptric of the first order), showing flashes at intervals of *half a minute.* It is elevated 225 feet above the sea, and should be visible in clear weather, where not obscured by the land, from a distance of about 21 miles.

For the present the light will only show with about one-third of its maximum intensity towards the land, between the bearings of N. by E., through east, and S.E. by S.

The light-house, situated on the summit of the islet, is 52 feet high, constructed of iron, and cylindrical in shape. The lower half is painted white, the upper half red, the lantern and keepers' dwellings white.

Approximate position, lat. 22° 11$\frac{1}{4}$′ N., long. 114° 18$\frac{1}{4}$′ E.

Also, that from the establishment of Wag lan islet light, the keepers, on hearing a bell, horn, steam whistle, or other sound indicating the proximity of a vessel, will fire two guns with an interval of *fifteen seconds* between them, and if the vessel's fog signal—showing that she is under way—continues to be heard, the guns are repeated after an interval of *twelve minutes*.

EASTERN ARCHIPELAGO—NATOENA ISLANDS.

Sunken rock off south-east coast of North Natoena island.

THE following Notice to Mariners issued by the Vice-Admiral Commanding the Naval Forces in Neth. India, No. 15, dated Batavia, 8th June 1893, is republished for general information :—

The Commander of the U. S. S. *Marion* reports that the American ship *Robert L. Belknap* was wrecked on an uncharted rock to the southward and eastward of *North Natoena* island, *China Sea.*

The rock is a pinnacle rock, with 17 feet of water on it.

The ship was aground forward and had 6 fathoms of water amidships and under her stern.

The rock lies on the following approximate bearings :—

Setokong island (summit ?) ... ... N. 9° W.
Semione island (summit ?) ... ... S. 70° 30′ W.

Also, that breakers extend about 3 miles seaward from the south-east shore of *North Natoena* island.

Bearings true.

(*See Notice to Mariners No.* 16/337, *Washington*, 1893.)

(*Note.*—It seems possible, that this is the reef named "*Batoe Penoeh.*"

(See Notice to Mariners No. 20, Batavia, 1892.)

This notice affects the charts : Nederlandsch Oost-Indië, blad II, 1867, and Zuidelijk gedeelte Chineesche Zee, blad II, 1886.

British North Borneo.—Sunken reef off Usakan island.

Information has been received of the existence of a shoal, about 3 cables in length, with a depth of 4 fathoms, except in one place where pinnacle rock exists with 11 feet of water at lowwater springtides, lying with

Usakan island bearing ... ... S. 25° W., distant 3½ miles
and *Nob* island ... ... N. 6° E.

Approx. position, lat. 6° 26′ 30″ N., long. 116° 17′ 45″ E.

Bearings magnetic.

(*See Str. Settl. Gov. Gazette No.* 22, 1893.)

British Nort Borneo.—Mallawalleé channel.

Sandy island beacon disappeared.

Information has been received that the beacon on *Sandy* island, south-east entrance to *Mallawalleé* channel, has disappeared.

Approx. position of site, lat. 6° 49′ 30″ N., long. 117° 37′ E.

(*See Notice to Mariners No.* 198, *London*, 1893.)

Strait Settlements.—Singapore—Submarine mining grounds.

From 26th May 1893, and until further notice, submarine mining grounds will be set apart, for the Royal Engineers, for training purposes.

1. On the South-West coast of *Blakang Mati* island, bounded as follows :—

On the North-West by a line from *Rimau-point* extending 1,000 yards to the South-West and there marked by a red spherical steel buoy. On the South-West by a line drawn from the abovementioned buoy to another red spherical steel buoy 2,000 yards due South of *Rimau-point.* On the South-East by a line drawn from the lastmentioned buoy North-East to *Blakang Mati* island. On the North-East by a portion of *Blakang Mati* island.

2. A rectangular area extending about 200 yards to the Eastward of the black beacon on the Northern extremity of *Buran Darat* coral reefs and 300 yards to the Northward of the reefs.

Pilots and Masters of vessels are warned not to anchor in these spaces and that dummy mines and floating obstructions may be met when navigating therein.

(*See Str. Settl. Gov. Gazette No.* 22, 1893.)

AUSTRALIA—TORRES STRAIT—INNER ROUTE.

Reported dangers—Princess Charlotte bay.

THE Portmaster, Brisbane, has given notice (No. 20 of 1893) of the existence of two dangers in the following positions, viz.—

A reef about ¼ mile in extent with a depth of 3 fathoms on it.
Bay Hill in line with Bathurst Head, bearing ... ... E. ½ S.
And d reef bearing ... ... N.E.

A reef of small extent, with two pinnacles, on which there is 3½ fathoms at low-water, lying about W. ¼ N. 3½ miles from the beacon on d reef.

The first-named danger lies on the recommended night course, off Princess Charlotte bay, and the latter one on or near to the usual day course. Mariners are therefore cautioned to exercise great care in that vicinity.

CHINA SEA—NATUNA ISLAND.

Reefs and wrecks near Pulo Laut.

NOTICE to Mariners No. 306 of 1893 issued by the British Admiralty is republished:—

The following information concerning certain reefs and wrecks near Pulo Laut, or North Natuna island, has been received from H.M.S. *Archer*, dated 3rd May 1893:—

1. Reefs which usually break at half tide, and which dry in places at low water spring tides, fringe the south-east coast of Pulo Laut for a distance of about 4 miles. The soundings for about one mile south-east of the outer edge of the reefs are 8 to 13 fathoms over uneven ground, thence depths of 18 to 20 fathoms, sand and coral bottom, were obtained till nearing Batu Penuh.

2. The wreck of the Swedish barque *Doris* lies on the abovementioned reef in about one foot at low water, with the east extreme of Sto Kong islet bearing N. ½ E., and the south-east extreme of Pulo Laut W. by N., distant about 3¼ miles. Approximate position, lat. 4° 41′ N., long. 108° 2′ E.

3. Batu Penuh, shown with 5¾ fathoms water on it, is an extensive shoal, composed of coral and white sand. A depth of 3¾ fathoms (at about low water) were obtained with the south-east extreme of Pulo Laut bearing W.N.W., distant 8¾ miles. Approximate position lat. 4° 38½′ N., long. 108° 6½′ E. Belknap rock, on which the American ship, *Robert L. Belknap*, was wrecked, forms a part of the abovementioned shoal. (*See* Notice to Mariners, No. 230 of 1893.)

4. The cylinders of a steamer with two piston rods on Gloria shoal uncover at low water, and resemble a rock awash.

Approximate position, lat. 4° 36′ N., long. 107° 59′ E.

CAUTION.—The waters surrounding this group are most imperfectly known.

NOTICES TO MARINERS.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 183.

[First Publication.]

STRAITS SETTLEMENTS—SINGAPORE.

Time-balls on Fort Canning and Pulau Brani.

THE following Notice to Mariners, issued by the Master Attendant, Straits Settlements, dated 8th July 1893, is published for general information:—

Time-balls on Fort Canning and Pulau Brani are dropped daily (Sundays excepted) at 1 P.M. Observatory mean-time. They are hoisted five minutes before 1 o'clock.

The Observatory at Fort Fullerton, from which the balls are dropped by electricity, is in—

Lat. ... ... 1° 17′ 13″ ·7 N.
Long. ... ... 103° 51′ 15″ ·7 E.
Ditto in time 6h. 55m. 25·05 sec.

When the ball drops at 1 P.M., local mean time, the corresponding Greenwich mean time is 6h. 4m. 34·95 sec. A.M.

Should the electricity fail, through lightning or other causes, to drop either or both of the balls, the ball that does not act will be kept up for about 5 minutes after 1 o'clock; it will then be dropped by hand and the time must not be depended on.

CHINA, EAST COAST—PUTOY GROUP—HONGKONG APPROACH.

Double flashing light and fog guns on Wag lan islet.

WITH reference to Notice to Mariners, No. 108, dated 1st May 1893, issued by this office, the British Admiralty has given further notice, that on 9th May 1893, a light was exhibited from the light-house recently erected on Wag lan islet, Putoy group, western side of approach to Hongkong by the Tathong channel:—

Wag lan islet light is a *double flashing white* light (dioptric of the first order), showing flashes at intervals of *half a minute*. It is elevated 225 feet above the sea, and should be visible in clear weather, where not obscured by the land, from a distance of about 21 miles.

For the present the light will only show with about one-third of its maximum intensity towards the land, between the bearings of N. by E., through east, and S.E. by S.

The light-house, situated on the summit of the islet, is 52 feet high, constructed of iron, and cylindrical in shape. The lower half is painted white, the upper half red, the lantern and keepers' dwellings white.

Approximate position, lat. 22° 11¼′ N., long. 114° 18½′ E.

Also, that from the establishment of Wag lan islet light, the keepers, on hearing a bell, horn, steam whistle, or other sound indicating the proximity of a vessel, will fire two guns with an interval of *fifteen seconds* between them, and if the vessel's fog signal—showing that she is under way—continues to be heard, the guns are repeated after an interval of *twelve minutes*.

EASTERN ARCHIPELAGO—Natoena islands.

Sunken rock off south-east coast of North Natoena island.

The following Notice to Mariners issued by the Vice-Admiral Commanding the Naval Forces in Neth. India, No. 15, dated Batavia, 8th June 1893, is republished for general information :—

The Commander of the U. S. S. *Marion* reports that the American ship *Robert L. Belknap* was wrecked on an uncharted rock to the southward and eastward of *North Natoena* island, *China Sea.*

The rock is a pinnacle rock, with 17 feet of water on it.

The ship was aground forward and had 6 fathoms of water amidships and under her stern.

The rock lies on the following approximate bearings :—

Setokong island (summit ?) ... ... N. 9° W.
Semione island (summit ?) ... ... S. 70° 30′ W.

Also, that breakers extend about 3 miles seaward from the south-east shore of *North Natoena* island.

Bearings true.

(*See Notice to Mariners No.* 16/337, *Washington*, 1893.)

(*Note.*—It seems possible, that this is the reef named "*Batoe Penoeh.*"

(See Notice to Mariners No. 20, Batavia, 1892.)

This notice affects the charts : Nederlandsch Oost-Indië, blad II, 1867, and Zuidelijk gedeelte Chineesche Zee, blad II, 1886.

British North Borneo.—Sunken reef off Usakan island.

Information has been received of the existence of a shoal, about 3 cables in length, with a depth of 4 fathoms, except in one place where pinnacle rock exists with 11 feet of water at lowwater springtides, lying with

Usakan island bearing ... ... S. 25° W., distant 3½ miles
and *Nob* island ... ... N. 6° E.

Approx. position, lat. 6° 26′ 30″ N., long. 116° 17′ 45″ E.

Bearings magnetic.

(*See Str. Settl. Gov. Gazette No.* 22, 1893.)

British Nort Borneo.—Mallawalleé channel.

Sandy island beacon disappeared.

Information has been received that the beacon on *Sandy* island, south-east entrance to *Mallawalleé* channel, has disappeared.

Approx. position of site, lat. 6° 49′ 30″ N., long. 117° 37′ E.

(*See Notice to Mariners No.* 198, *London*, 1893.)

Strait Settlements.—Singapore—Submarine mining grounds.

From 26th May 1893, and until further notice, submarine mining grounds will be set apart, for the Royal Engineers, for training purposes.

1. On the South-West coast of *Blakang Mati* island, bounded as follows :—

On the North-West by a line from *Rimau-point* extending 1,000 yards to the South-West and there marked by a red spherical steel buoy. On the South-West by a line drawn from the abovementioned buoy to another red spherical steel buoy 2,000 yards due South of *Rimau-point*. On the South-East by a line drawn from the lastmentioned buoy North-East to *Blakang Mati* island. On the North-East by a portion of *Blakang Mati* island.

2. A rectangular area extending about 200 yards to the Eastward of the black beacon on the Northern extremity of *Buran Darat* coral reefs and 300 yards to the Northward of the reefs.

Pilots and Masters of vessels are warned not to anchor in these spaces and that dummy mines and floating obstructions may be met when navigating therein.

(*See Str. Settl. Gov. Gazette No.* 22, 1893.)

This notice affects the charts : Nederlandsch Oost-Indië, blad I, 1867, Zuidelijk gedeelte Chineesche Zee, blad I, 1893, and Riouw en Linga Archipel, blad I, 1891.

CHINA SEA—NATUNA ISLAND.

Reefs and wrecks near Pulo Laut.

NOTICE to Mariners No. 306 of 1893 issued by the British Admiralty is republished:—

The following information concerning certain reefs and wrecks near Pulo Laut, or North Natuna island, has been received from H.M.S. *Archer*, dated 3rd May 1893:—

1. Reefs which usually break at half tide, and which dry in places at low water spring tides, fringe the south-east coast of Pulo Laut for a distance of about 4 miles. The soundings for about one mile south-east of the outer edge of the reefs are 8 to 13 fathoms over uneven ground, thence depths of 18 to 20 fathoms, sand and coral bottom, were obtained till nearing Batu Penuh.

2. The wreck of the Swedish barque *Doris* lies on the abovementioned reef in about one foot at low water, with the east extreme of Sto Kong islet bearing N. ⅛ E., and the south-east extreme of Pulo Laut W. by N., distant about 3¼ miles. Approximate position, lat. 4° 41′ N., long. 108° 2′ E.

3. Batu Penuh, shown with 5¾ fathoms water on it, is an extensive shoal, composed of coral and white sand. A depth of 3¾ fathoms (at about low water) were obtained with the south-east extreme of Pulo Laut bearing W.N.W., distant 8¾ miles. Approximate position lat. 4° 38½′ N., long. 108° 6½′ E. Belknap rock, on which the American ship, *Robert L. Belknap*, was wrecked, forms a part of the abovementioned shoal. (*See* Notice to Mariners, No. 230 of 1893.)

4. The cylinders of a steamer with two piston rods on Gloria shoal uncover at low water, and resemble a rock awash.

Approximate position, lat. 4° 36′ N., long. 107° 59′ E.

CAUTION.—The waters surrounding this group are most imperfectly known.

STRAITS SETTLEMENTS—SINGAPORE.

Time-balls on Fort Canning and Pulau Brani.

THE following Notice to Mariners, issued by the Master Attendant, Straits Settlements, dated 8th July 1893, is published for general information:—

Time-balls on Fort Canning and Pulau Brani are dropped daily (Sundays excepted) at 1 P.M. Observatory mean-time. They are hoisted five minutes before 1 o'clock.

The Observatory at Fort Fullerton, from which the balls are dropped by electricity, is in—

Lat.	1° 17′ 13″·7 N.
Long.	103° 51′ 15″·7 E.

Ditto in time 6h. 55m. 25·05 sec.

When the ball drops at 1 P.M., local mean time, the corresponding Greenwich mean time is 6h. 4m. 34·95 sec. A.M.

Should the electricity fail, through lightning or other causes, to drop either or both of the balls, the ball that does not act will be kept up for about 5 minutes after 1 o'clock ; it will then be dropped by hand and the time must not be depended on.

CHINA, EAST COAST—PUTOY GROUP—HONGKONG APPROACH.

Double flashing light and fog guns on Wag lan islet.

WITH reference to Notice to Mariners, No. 108, dated 1st May 1893, issued by this office, the British Admiralty has given further notice, that on 9th May 1893, a light was exhibited from the light-house recently erected on Wag lan islet, Putoy group, western side of approach to Hongkong by the Tathong channel:—

Wag lan islet light is a *double flashing white* light (dioptric of the first order), showing flashes at intervals of *half a minute*. It is elevated 225 feet above the sea, and should be visible in clear weather, where not obscured by the land, from a distance of about 21 miles.

For the present the light will only show with about one-third of its maximum intensity towards the land, between the bearings of N. by E., through east, and S.E. by S.

The light-house, situated on the summit of the islet, is 52 feet high, constructed of iron, and cylindrical in shape. The lower half is painted white, the upper half red, the lantern and keepers' dwellings white.

Approximate position, lat. 22° 11¼′ N., long. 114° 18¼′ E.

Also, that from the establishment of Wag lan islet light, the keepers, on hearing a bell, horn, steam whistle, or other sound indicating the proximity of a vessel, will fire two guns with an interval of *fifteen seconds* between them, and if the vessel's fog signal—showing that she is under way—continues to be heard, the guns are repeated after an interval of *twelve minutes*.

AUSTRALIA, EAST COAST—BRISBANE RIVER BAR.

Tidal signals—Pile light-house.

WITH reference to Notice to Mariners, No. 115, dated 15th May last, issued by this office, the British Admiralty has given further notice (No. 345 of 1893) that on 17th May 1893 the original Code of Tidal Signals, as contained in the Local Harbour Regulations, would replace that previously in use at Pile light-house, Brisbane river bar.

The depth shown by this Code is the tidal rise added to 14 feet, and that depth now exists between the river entrance and the Magazine. From the last-named point upwards the available depth is 5½ feet less than that above given; but it was anticipated that at the end of June 1893 navigation would be completely restored, and that there would be a depth of 14 feet at low water spring tides as far as Town reach.

STRAITS SETTLEMENTS—SINGAPORE.

Time-balls on Fort Canning and Pulau Brani.

THE following Notice to Mariners, issued by the Master Attendant, Straits Settlements, dated 8th July 1893, is published for general information:—

Time-balls on Fort Canning and Pulau Brani are dropped daily (Sundays excepted) at 1 P.M. Observatory mean-time. They are hoisted five minutes before 1 o'clock.

The Observatory at Fort Fullerton, from which the balls are dropped by electricity, is in—

Lat. ... ... 1° 17′ 13″ ·7 N.
Long. ... ... 103° 51′ 15″ ·7 E.
Ditto in time 6h. 55m. 25·05 sec.

When the ball drops at 1 P.M., local mean time, the corresponding Greenwich mean time is 6h. 4m. 34·95 sec. A.M.

Should the electricity fail, through lightning or other causes, to drop either or both of the balls, the ball that does not act will be kept up for about 5 minutes after 1 o'clock; it will then be dropped by hand and the time must not be depended on.

CHINA—SOUTH-EAST COAST—HONGKONG APPROACH.

Rocky patches and sunken rock, Tytam peninsula and Wag lan islet.

NOTICE to Mariners No. 376 of 1893 issued by the British Admiralty is republished for general information :—

A survey recently carried out by Lieutenant Combe, under the orders of Captain W. U. Moore, H.M. Surveying ship *Penguin*, shows the existence of the two undermentioned patches lying southward of Tytam peninsula, in the approach to Honkong by the East Lamma channel, and about 4 cables south-west of the outer part of the measured mile line :—

a. A rocky patch, with 6 fathoms water on it, lies with the east extreme of Tytam peninsula bearing N.N.E. (N. 22½° E.), distant 10½ cables, and Castle rock E. by S. ½ S. (S. 73°E.)

Approximate position, lat. 22° 11′ N., long. 114° 13′ E.

b. A rocky patch, with 6 fathoms water on it, lies 1½ cables S.S.E. (S22½° E.) from the abovementioned patch (*a*).

(2) *Sunken rock and rocky patch west and south-west of Wag lan islet.*

Also with reference to Notice to Mariners No. 304 of 1893, on the existence of a rock with 4 fathoms water on it, lying in the fairway between Wag lan and Sun kong islets, on the western side of the approach to Hongkong from the south-east :—That a depth of 3 fathoms exists about 150 yards southward of the position previously given, with the north extreme of North Wag lan bearing N.E. ½ E. (N. 50½° E.), and the south extreme of South Wag lan E. ¾ S. (S. 81½° E.), distant 3½ cables.

Approximate position, lat. 22° 10′ 55″ N., long. 114° 17′ 50″ E.

Also that a rocky patch, with 6 fathoms water on it, lies 2 cables S.E. by S. (S. 34° E.) from the abovementioned sunken rock, and with the south extreme of South Wag lan bearing N.E. by E. ½ E. (N. 62° E.).

The depths given are at low water spring tides.

JAPAN—KIUSIU.

Rocky shoals in approach to Nagasaki.

THE British Admiralty has given notice (No. 373 of 1893) of the existence of the two undermentioned rocky shoals lying in the approach to Nagasaki :—

1. A shoal, with 7 fathoms water on it, and 11 to 12 fathoms close around, lies with Kageno light-house bearing S. 45° E., and Iwo Sima light-house S. 46° W., distant, 8½ cables.

   Approximate position, lat. 32° 44′ 30″ N., long. 129° 46′ 30″ E.

2. A shoal, with 6¼ fathoms water on it, lies with the south extreme of Ogami point bearing N. 26° E., and Kageno light-house S. 72° W., distant 8¼ cables.

The depths given are at low water spring tides.

SUMATRA, NORTH COAST—JUMBU AYER OR DIAMOND POINT.

Shoals to the westward.

THE British Admiralty has given notice (No. 374 of 1893) of the existence of the two undermentioned coral shoals lying westward of Jambu Ayer or Diamond Point :—

1. A shoal (*Karang Minja*), about 55 yards in extent, with 6 to 9 fathoms water on it, and 20 fathoms close around, lies with Jambu Ayer bearing S. 73° E., and the trees at Pidada S. 2° W.

   Approximate position on Admiralty charts lat. 5° 18′ N., long. 97° 23′ 45″ E.

2. A shoal (*Karang Tenga*), with 3 fathoms water on it, lies with Jambu Ayer bearing S. 80° E., and the trees at Pidada S. 12° W.

Under favourable conditions, these shoals are indicated by ripples and discoloured water.

NOTE.—The local fishermen state that there are three other shoals near Karang Tenga, for which further search will be made.

The depths given are at low water spring tides.

CHINA—SOUTH-EAST COAST—HONGKONG APPROACH.

Rocky patches and sunken rock, Tytam peninsula and Wag lan islet.

NOTICE to Mariners No. 376 of 1893 issued by the British Admiralty is republished for general information :—

A survey recently carried out by Lieutenant Combe, under the orders of Captain W. U. Moore, H.M. Surveying ship *Penguin*, shows the existence of the two undermentioned patches lying southward of Tytam peninsula, in the approach to Honkong by the East Lamma channel, and about 4 cables south-west of the outer part of the measured mile line :—

a. A rocky patch, with 6 fathoms water on it, lies with the east extreme of Tytam peninsula bearing N.N.E. (N. 22½° E.), distant 10½ cables, and Castle rock E. by S. ½ S. (S. 73°E.)

Approximate position, lat. 22° 11′ N., long. 114° 13′ E.

b. A rocky patch, with 6 fathoms water on it, lies 1½ cables S.S.E. (S22½° E.) from the abovementioned patch (*a*).

(2) *Sunken rock and rocky patch west and south-west of Wag lan islet.*

Also with reference to Notice to Mariners No. 304 of 1893, on the existence of a rock with 4 fathoms water on it, lying in the fairway between Wag lan and Sun kong islets, on the western side of the approach to Hongkong from the south-east:—That a depth of 3 fathoms exists about 150 yards southward of the position previously given, with the north extreme of North Wag lan bearing N.E. ⅓ E. (N. 50⅓° E.), and the south extreme of South Wag lan E. ¾ S. (S. 81⅓° E.), distant 3½ cables.

Approximate position, lat. 22° 10′ 55″ N., long. 114° 17′ 50″ E.

Also that a rocky patch, with 6 fathoms water on it, lies 2 cables S.E. by S. (S. 34° E.) from the abovementioned sunken rock, and with the south extreme of South Wag lan bearing N.E. by E. ½ E. (N. 62° E.).

The depths given are at low water spring tides.

CHINA SEA—SINGAPORE.

Notice of practice with submarine mines.

THE following Notice to Mariners, No. 360 of 1893, received from the British Admiralty, is republished for general information :—

Information has been received through the Board of Trade that until further notice practice with submarine mines will take place within the undermentioned areas at Singapore :—

1. The mine field on the south-west coast of Blakang Mati island is bounded as follows.—On the north-west by a line from Tanjong Rimau extending 5 cables to the south-west, and there maked by a *spherical* red buoy ; thence by a line drawn to a similar buoy placed one mile south of that point ; and thence by a line extending in a north-east direction to the coast of Blakang Mati island.

2. A rectangular area extending about one cable eastward of the black beacon on Buran Durat reef (eastward of Blakang Mati island), and above 1⅔ cables northward of the reef.

NOTE.—Mariners are warned not to anchor or navigate within the above mentioned spaces, as obstructions may be met with.

[First Publication.]

AUSTRALIA—TORRES STRAIT, INNER ROUTE.

Danger off No. 2, Claremont island.

THE Portmaster, Brisbane, has given notice (No. 21 of 1893) that the danger reported in May last to exist off No. 2, Claremont island, and notified in Notice No. 18 from this Department, has been found and examined by Captain Heming, of H.M.S. *Paluma*, who reports as follows :—

"The danger is small in extent, and has 13 feet over it at low-water springs. It lies with the north extreme of Hannah islet (No. 2, Claremont), bearing E. by S. ½ S., distant 2 miles."

NOTICE TO MARINERS—No. 205.

[First Publication.]

AUSTRALIA—Brisbane river.

Dredged channels.

The Portmaster, Brisbane, has given notice (No. 22 of 1893) that a net depth of 15 feet now exists throughout the river between the town and the Outer Bar, and on the latter the minimum depth is 14 feet at low-water springs.

As the cuttings are only 100 feet wide, masters of vessels are cautioned to exercise great care, and to avoid as far as possible meeting another vessel in the cuttings, and to slow down to a low rate of speed at such distance from dredges and attendant plant as will ensure their passing without causing any damage.

The magnetic bearings of the line of lights and beacons at Eagle Farm Flats and at the Inner Bar are now—

N. 25° E. and N. 23° 30′ E., respectively.

The list giving the magnetic bearings of the different lines of leading beacons is to be corrected accordingly.

NOTICE TO MARINERS—No. 206.

[First Publication.]

AUSTRALIA—Burnett bar.

Directions to enter.

The Portmaster, Brisbane, has given notice (No. 23 of 1893) that the lights and beacons to lead in over the bar, lead across with a minimum depth at low water of 4½ feet. The tidal signals exhibited give the depth of water across the bar on this lead.

In addition to the abovementioned original lead, which is continued, the south channel has been marked and lighted, carrying a depth of 6½ feet at low water. These marks are as follows:—

An obelisk beacon—white with red top—placed on outer beach 240 feet S. 61° E. from light-house. Two triangular white beacons with vertical black stripe in centre placed on the sands off the North Head.

Directions to enter.—Bring the obelisk and light-house in line, bearing N. 61° W. and steer in, passing a red buoy on the starboard hand, until the triangular beacons, bearing about N.-W. ½ N. are in line, keep the latter in line, passing a black buoy on the port hand, until the beacons of the "Bar Lead," bearing S.-W. by W. ½ W. are in line, when they are to be kept so, and a vessel will proceed as usual.

By night a red light is shown from the obelisk beacon, which is to be kept in line with the main light at the light-house until the lights on the triangular beacons, the nearer of which is a red light, are in line. The latter will then be kept in line until the white lights of the Bar Lead are in line, when a vessel will proceed as usual.

By using this channel two feet more water will be carried than in the old straight lead over the bar, but mariners are cautioned that the leads take a vessel close to the outer beach, and that great care must be exercised to avoid getting to the westward of the second lead.

[First Publication.]

AUSTRALIA, EAST COAST—PRINCESS CHARLOTTE BAY, INNER ROUTE.

Reefs reported south-west and west of Dhu (D) reef.

THE British Admiralty has given notice (No. 393 of 1893) of the existence of the following two sunken reefs in Princess Charlotte bay:—

Positions must be considered very approximate, and care should be exercised in passing the localities:—

1. A reef about a quarter of a mile in extent, with a depth of 3 fathoms on it, lies with Dhu (*d*) reef beacon, bearing N.E. (N. 45° E.), distant about 7 miles; and Bay hill, about E. ½ S. (S. 84½° E.).

Approximate position, lat. 14° 11′ 40″ S., long. 143° 54′ 40″ E.

2. A reef of small extent, with two pinnacles on which there are depths of 3½ fathoms at low water, lies with Dhu (*d*) reef beacon, bearing E. ¼ S. (S. 87¼° E.), distant 3½ miles; and Sea (*c*) reef beacon about N.E. ½ E. (N. 50½° E.).

Approximate position, lat. 14° 6′ 50″ S., long. 143° 56′ 30″ E.

Note.—As reef No. 1 lies close to the "course recommended by night" on Admiralty Chart, No. 2922, that course has been expunged from the chart.

[First Publication.]

JAPAN SEA, west shore—Port Lazaref.

Sunken rocks southward of Desfossés Point.

The British Admiralty has given notice (No. 394 of 1893) of the existence of sunken rocks, on which the Russian vessel-of-war *Vityaz* recently struck, lying in the channe between Desfossés Point and Zavalishin island, entrance to port Lazaref.

These rocks, with depths of 11 and 13 feet on them, are situated on a shoal, with depths of 4 to 5½ fathoms on it, about a cable in extent east and west, and a quarter of a cable north and south. From the 11 feet rock Desfossés Point bears N. by W ⅞ W (N. 21¼° W.), distant 7½ cables; and north point of Kuprianof island E. by S. (S. 78¾° E.). The 13 feet rock lies nearly half a cable E. by S. (S. 78¾° E.) from the 11 feet rock.

Approximate position, lat. 39° 16¼′ N., long. 127° 37′ E.

Amended position of Khalezof (Mouchez) island.

Also, from H.M.S. *Porpoise*, that Khalezof (Mouchez) island is situated in lat. 39° 0′ 40″ N., long. 128° 5′ 40″ E.

[Second Publication.]

EASTERN ARCHIPELAGO—Belitoeng island, west coast.

Approaches to Tandjoeng Pandan road—Beacons erected and newly discovered dangers.

The following notice to mariners issued by the Vice-Admiral Commanding the naval forces in Neth. India, No. 21, dated the 31st July 1893, is republished for general information:—

Notice is given that 5 new wooden beacons have been erected for marking the channel to *Tjeroetjoep* river, *Tandjoeng Pandan* road, West coast *Belitoeng;* two of these beacons are painted black and the others are painted white.

Before *Kalmoa* there are now 7 black and 8 white beacons, and the channel beyond *Kalmoa* is marked by 3 white beacons.

Also that the Dutch steamer *Cheribon* has found the following two shoals:—

1. A coral reef, with 4 fathoms water on it, near the black buoy, on the following bearings:—

Eastern extreme of *Kelmanbang* island	... ...	S. 26° W.
Oeloe Boeloh	... ...	S. 2° 30′ W.
Kalmoa	... ...	S. 56° 30′ E.

2. A coral reef, with 3 fathoms water on it, lies with shoal n°. 1, bearing S. 26° W., distant about 330 yards.

Bearings true.

This notice affects the charts: Nederlandsch Oost-Indië, blad II, 1867; Westkust Borneo, blad II, 1885; Gaspar straten 1880; Java Zee en aangr. vaarw. blad 1, 1892 and Westkust Belitoeng, Reede Tandjoeng Pandan en vaarwaters naar de reede, 1890.

SUMATRA, north coast—Jumbu Ayer or Diamond Point.

Shoals to the westward.

The British Admiralty has given notice (No. 374 of 1893) of the existence of the two undermentioned coral shoals lying westward of Jambu Ayer or Diamond Point:—

1. A shoal (*Karang Minja*), about 55 yards in extent, with 6 to 9 fathoms water on it, and 20 fathoms close around, lies with Jambu Ayer bearing S. 73° E., and the trees at Pidada S. 2° W.

Approximate position on Admiralty charts lat. 5° 18′ N., long. 97° 23′ 45″ E.

2. A shoal (*Karang Tenga*), with 3 fathoms water on it, lies with Jambu Ayer bearing S. 80° E., and the trees at Pidada S. 12° W.

Under favourable conditions, these shoals are indicated by ripples and discoloured water.

Note.—The local fishermen state that there are three other shoals near Karang Tenga, for which further search will be made.

The depths given are at low water spring tides.

CHINA—South-east coast—Hongkong approach.

Rocky patches and sunken rock, Tytam peninsula and Wag lan islet.

Notice to Mariners No. 376 of 1893 issued by the British Admiralty is republished for general information:—

A survey recently carried out by Lieutenant Combe, under the orders of Captain W. U. Moore, H.M. Surveying ship *Penguin*, shows the existence of the two undermentioned patches lying southward of Tytam peninsula, in the approach to Honkong by the East Lamma channel, and about 4 cables south-west of the outer part of the measured mile line:—

a. A rocky patch, with 6 fathoms water on it, lies with the east extreme of Tytam peninsula bearing N.N.E. (N. 22½° E.), distant 10½ cables, and Castle rock E. by S. ½ S. (S. 73°E.)

Approximate position, lat. 22° 11′ N., long. 114° 13′ E.

b. A rocky patch, with 6 fathoms water on it, lies 1½ cables S.S.E. (S22½° E.) from the abovementioned patch (*a*).

(2) *Sunken rock and rocky patch west and south-west of Wag lan islet.*

Also with reference to Notice to Mariners No. 304 of 1893, on the existence of a rock with 4 fathoms water on it, lying in the fairway between Wag lan and Sun kong islets, on the western side of the approach to Hongkong from the south-east:—That a depth of 3 fathoms exists about 150 yards southward of the position previously given, with the north extreme of North Wag lan bearing N.E. ½ E. (N. 50½° E.), and the south extreme of South Wag lan E. ¾ S. (S. 81½° E.), distant 3½ cables.

Approximate position, lat. 22° 10′ 55″ N., long. 114° 17′ 50″ E.

Also that a rocky patch, with 6 fathoms water on it, lies 2 cables S.E. by S. (S. 34° E.) from the abovementioned sunken rock, and with the south extreme of South Wag lan bearing N.E. by E. ½ E. (N. 62° E.).

The depths given are at low water spring tides.

CHINA SEA—FORMOSA STRAIT.

Pescadores islands, Sunken rock northward of Triangle island.

THE British Admiralty has given notice (No. 402 of 1893) that the following information relating to the existence of a rock, on which H. M. S. *Mercury* recently touched, situated northward of Triangle island, Pescadores islands, is the result of an examination of the locality by H. M. S. *Plover*:—

A rock, with a depth of 9 feet on it at low water, lies with Tortoise rock, bearing N. $\frac{7}{8}$ W. (N. 10° W.), distant $1\frac{1}{3}$ miles; and Niu point E. $\frac{1}{2}$ S. (S. $84\frac{1}{2}$° E.). Shoal ground, with depths of 2 to 5 fathoms on it, extends generally a quarter of a mile from the rock in all directions; and a patch of $4\frac{1}{2}$ fathoms lies N. $\frac{1}{2}$ E. (N. 5° E.) $3\frac{1}{2}$ cables from it.

Approximate position, 9 feet rock, lat. 23° 38′ 40″ N., long. 119° 30′ 40″ E.

AUSTRALIA—BURNETT BAR.

Directions to enter.

THE Portmaster, Brisbane, has given notice (No. 23 of 1893) that the lights and beacons to lead in over the bar, lead across with a minimum depth at low water of 4½ feet. The tidal signals exhibited give the depth of water across thebar on t his lead.

In addition to the abovementioned original lead, which is continued, the south channel has been marked and lighted, carrying a depth of 6½ feet at low water. These marks are as follows:—

An obelisk beacon—white with red top—placed on outer beach 240 feet S. 61° E. from light-house. Two triangular white beacons with vertical black stripe in centre placed on the sands off the North Head.

Directions to enter.—Bring the obelisk and light-house in line, bearing N. 61° W. and steer in, passing a red buoy on the starboard hand, until the triangular beacons, bearing about N.-W. ½ N. are in line, keep the latter in line, passing a black buoy on the port hand, until the beacons of the "Bar Lead," bearing S.-W. by W. ½ W. are in line, when they are to be kept so, and a vessel will proceed as usual.

By night a red light is shown from the obelisk beacon, which is to be kept in line with the main light at the light-house until the lights on the triangular beacons, the nearer of which is a red light, are in line. The latter will then be kept in line until the white lights of the Bar Lead are in line, when a vessel will proceed as usual.

By using this channel two feet more water will be carried than in the old straight lead over the bar, but mariners are cautioned that the leads take a vessel close to the outer beach, and that great care must be exercised to avoid getting to the westward of the second lead.

AUSTRALIA, EAST COAST—PRINCESS CHARLOTTE BAY, INNER ROUTE.

Reefs reported south-west and west of Dhu (D) reef.

THE British Admiralty has given notice (No. 393 of 1893) of the existence of the following two sunken reefs in Princess Charlotte bay:—

Positions must be considered very approximate, and care should be exercised in passing the localities:—

1. A reef about a quarter of a mile in extent, with a depth of 3 fathoms on it, lies with Dhu (*d*) reef beacon, bearing N.E. (N. 45° E.), distant about 7 miles; and Bay hill, about E. ½ S. (S. 84½° E.).

Approximate position, lat. 14° 11′ 40″ S., long. 143° 54′ 40″ E.

2. A reef of small extent, with two pinnacles on which there are depths of 3½ fathoms at low water, lies with Dhu (*d*) reef beacon, bearing E. ¼ S. (S. 87¼° E.), distant 3½ miles; and Sea (*c*) reef beacon about N.E. ½ E. (N. 50½° E.).

Approximate position, lat. 14° 6′ 50″ S., long. 143° 56′ 30″ E.

Note.—As reef No. 1 lies close to the "course recommended by night" on Admiralty Chart, No. 2922, that course has been expunged from the chart.

JAPAN SEA, WEST SHORE—PORT LAZAREF.

Sunken rocks southward of Desfossés Point.

THE British Admiralty has given notice (No. 394 of 1893) of the existence of sunken rocks, on which the Russian vessel-of-war *Vityaz* recently struck, lying in the channel between Desfossés Point and Zavalishin island, entrance to port Lazaref.

These rocks, with depths of 11 and 13 feet on them, are situated on a shoal, with depths of 4 to 5½ fathoms on it, about a cable in extent east and west, and a quarter of a cable north and south. From the 11 feet rock Desfossés Point bears N. by W ⅞ W (N. 21¼° W.), distant 7½ cables; and north point of Kuprianof island E. by S. (S. 78¾° E.). The 13 feet rock lies nearly half a cable E. by S. (S. 78¾° E.) from the 11 feet rock.

Approximate position, lat. 39° 16¼′ N., long. 127° 37′ E.

Amended position of Khalezof (Mouchez) island.

Also, from H.M.S. *Porpoise*, that Khalezof (Mouchez) island is situated in lat. 39° 0′ 40″ N., long. 128° 5′ 40″ E.

Approaches to Tandjoeng Pandan road—Beacons erected and newly discovered dangers.

THE following notice to mariners issued by the Vice-Admiral Commanding the naval forces in Neth. India, No. 21, dated the 31st July 1893, is republished for general information:—

Notice is given that 5 new wooden beacons have been erected for marking the channel to *Tjeroetjoep* river, *Tandjoeng Pandan* road, West coast *Belitoeng*; two of these beacons are painted black and the others are painted white.

Before *Kalmoa* there are now 7 black and 8 white beacons, and the channel beyond *Kalmoa* is marked by 3 white beacons.

Also that the Dutch steamer *Cheribon* has found the following two shoals:—

1. A coral reef, with 4 fathoms water on it, near the black buoy, on the following bearings:—

Eastern extreme of *Kelmanbang* island	S. 26° W.
Oeloe Boeloh	S. 2° 30′ W.
Kalmoa	S. 56° 30′ E.

2. A coral reef, with 3 fathoms water on it, lies with shoal n°. 1, bearing S. 26° W., distant about 330 yards.

Bearings true.

Balabalangan or Little Paternoster islands—Newly discovered dangers.

THE following Notice to Mariners, issued by the Vice-Admiral Commanding the Naval forces in Neth. India, No. 27, dated the 29th August 1893, is republished for general information:—

The Commander of H. N. M. Surveying vessel *Banda* reports the existence of the following shoals off the *Little Paternoster* islands :—

1. A bank, 4 miles long in a N. and S. direction with depths of 4 and 5 fathoms on it. The shoalest part found lies near its southern edge in approximately lat. 2° 8′ S., long. 117° 1′ E.

2. A ridge of reefs, awash at low water, commences 2 miles southward of the abovementioned bank.

3. Many spots, with 6 to 7 fathoms water, lie eastward of the abovementioned shoals. The shoalest spot found (5 fathoms) lies with *Amboengi* rock (*Karang Tiga*), bearing S. S. E., distant about 1 mile.

Bearing true.

[Third Publication.]

AUSTRALIA—Burnett bar.

Directions to enter.

The Portmaster, Brisbane, has given notice (No. 26 of 1893) that the lights and beacons to lead in over the bar, lead across with a minimum depth at low water of 4½ feet. The tidal signals exhibited give the depth of water across thebar on this lead.

In addition to the abovementioned original lead, which is continued, the south channel has been marked and lighted, carrying a depth of 6½ feet at low water. These marks are as follows:—

An obelisk beacon—white with red top—placed on outer beach 240 feet S. 61° E. from light-house. Two triangular white beacons with vertical black stripe in centre placed on the sands off the North Head.

Directions to enter.—Bring the obelisk and light-house in line, bearing N. 61° W. and steer in, passing a red buoy on the starboard hand, until the triangular beacons, bearing about N.-W. ½ N. are in line, keep the latter in line, passing a black buoy on the port hand, until the beacons of the "Bar Lead," bearing S.-W. by W. ½ W. are in line, when they are to be kept so, and a vessel will proceed as usual.

By night a red light is shown from the obelisk beacon, which is to be kept in line with the main light at the light-house until the lights on the triangular beacons, the nearer of which is a red light, are in line. The latter will then be kept in line until the white lights of the Bar Lead are in line, when a vessel will proceed as usual.

By using this channel two feet more water will be carried than in the old straight lead over the bar, but mariners are cautioned that the leads take a vessel close to the outer beach, and that great care must be exercised to avoid getting to the westward of the second lead.

AUSTRALIA, EAST COAST—PRINCESS CHARLOTTE BAY, INNER ROUTE.

Reefs reported south-west and west of Dhu (D) reef.

THE British Admiralty has given notice (No. 393 of 1893) of the existence of the following two sunken reefs in Princess Charlotte bay:—

Positions must be considered very approximate, and care should be exercised in passing the localities:—

1. A reef about a quarter of a mile in extent, with a depth of 3 fathoms on it, lies with Dhu (*d*) reef beacon, bearing N.E. (N. 45° E.), distant about 7 miles; and Bay hill, about E. ¼ S. (S. 84½° E.).

Approximate position, lat. 14° 11′ 40″ S., long. 143° 54′ 40″ E.

2. A reef of small extent, with two pinnacles on which there are depths of 3½ fathoms at low water, lies with Dhu (*d*) reef beacon, bearing E. ¼ S. (S. 87¼° E.), distant 3½ miles; and Sea (*c*) reef beacon about N.E. ½ E. (N. 50½° E.).

Approximate position, lat. 14° 6′ 50″ S., long. 143° 56′ 30″ E.

Note.—As reef No. 1 lies close to the "course recommended by night" on Admiralty Chart, No. 2922, that course has been expunged from the chart.

JAPAN SEA, WEST SHORE—PORT LAZAREF.

Sunken rocks southward of Desfossés Point.

THE British Admiralty has given notice (No. 394 of 1893) of the existence of sunken rocks, on which the Russian vessel-of-war *Vityaz* recently struck, lying in the channel between Desfossés Point and Zavalishin island, entrance to port Lazaref.

These rocks, with depths of 11 and 13 feet on them, are situated on a shoal, with depths of 4 to 5½ fathoms on it, about a cable in extent east and west, and a quarter of a cable north and south. From the 11 feet rock Desfossés Point bears N. by W ⅞ W (N. 21¼° W.), distant 7½ cables; and north point of Kuprianof island E. by S. (S. 78¾° E.). The 13 feet rock lies nearly half a cable E. by S. (S. 78¾° E.) from the 11 feet rock.

Approximate position, lat. 39° 16¼′ N., long. 127° 37′ E.

Amended position of Khalezof (Mouchez) island.

Also, from H.M.S. *Porpoise*, that Khalezof (Mouchez) island is situated in lat. 39° 0′ 40″ N., long. 128° 5′ 40″ E.

* In leap years, *for* "28th February" *read* "29th February."

1. Vessels taking steam one way to pay two-third loaded inward and outward rates.
2. No reduction made for vessels towed between Chittagong and sea.
3. On two or more vessels applying for steam at the same time, preference will be given to that first cleared at the Custom House, provided she be ready to sail.
4. A demurrage fine of Rs. 50 will be charged for every time steam is raised and not availed of by vessel making the application.
5. In the event of a vessel getting aground whilst being towed, a special agreement shall be made by the Captain of the Tug Services.
6. Should the service of the tug be required to shift a ship from one mooring to another, there shall be an extra charge made of Rs. 100.

For any further particulars apply personally to the Vice-Chairman, Port Commissioners, Chittagong.

N.B.—Masters of vessels are hereby informed that the Port Commissioners of Chittagong have acquired a powerful twin-screw salvage tug for towing and assisting vessels trading to this port. This step was unavoidable, as the private tug only came and remained during the busy shipping season, after which the port was left without a tug. Consequently vessels were put to great inconvenience; ships were delayed and often had to pay exorbitant rates for towage by mail steamers, and even the latter were not always available. Shipmasters have on many occasions urged on the Port authorities the necessity of a powerful boat being stationed here for assisting vessels. The Commissioners at considerable expense have now supplied the steam-tug *Gekko*, which is fit to render any assistance, and trust it may meet with support.

Balabalangan or Little Paternoster islands—Newly discovered dangers.

THE following Notice to Mariners, issued by the Vice-Admiral Commanding the Naval forces in Neth. India, No. 27, dated the 29th August 1893, is republished for general information:—

The Commander of H. N. M. Surveying vessel *Banda* reports the existence of the following shoals off the *Little Paternoster* islands:—

1. A bank, 4 miles long in a N. and S. direction with depths of 4 and 5 fathoms on it. The shoalest part found lies near its southern edge in approximately lat. 2° 8′ S., long. 117° 1′ E.

2. A ridge of reefs, awash at low water, commences 2 miles southward of the abovementioned bank.

3. Many spots, with 6 to 7 fathoms water, lie eastward of the abovementioned shoals. The shoalest spot found (5 fathoms) lies with *Amboengi* rock (*Karang Tiga*), bearing S. S. E., distant about 1 mile.

Bearing true.

Balabalangan or Little Paternoster islands—Newly discovered dangers.

The following Notice to Mariners, issued by the Vice-Admiral Commanding the Naval forces in Neth. India, No. 27, dated the 29th August 1893, is republished for general information:—

The Commander of H. N. M. Surveying vessel *Banda* reports the existence of the following shoals off the *Little Paternoster* islands:—

1. A bank, 4 miles long in a N. and S. direction with depths of 4 and 5 fathoms on it. The shoalest part found lies near its southern edge in approximately lat. 2° 8′ S., long. 117° 1′ E.

2. A ridge of reefs, awash at low water, commences 2 miles southward of the abovementioned bank.

3. Many spots, with 6 to 7 fathoms water, lie eastward of the abovementioned shoals. The shoalest spot found (5 fathoms) lies with *Amboengi* rock (*Karang Tiga*), bearing S. S. E., distant about 1 mile.

Bearing true.

This notice affects the charts: Nederlandsch Oost-Indië, blad II, 1867, and Straat Mangkasar, blad II, 1890.

CHINA SEA—BANKA STRAIT.

Flashing light on West Nangka.

WITH reference to notice to mariners, No. 395 of 1892, the British Admiralty has given further notice (No. 450 of 1893), that a light is now exhibited from a light-house erected on West Nangka, east side of Banka strait:—

West Nangka light is a *flashing white* light, showing one long flash *every thirty seconds*, elevated 196 feet above the sea, and should be visible in clear weather, except where obscured by the other Nangka islands, from a distance of 20 miles.

The light-house is a twelve-sided iron tower, painted white, and 87 feet high. It is situated on a hill on the western side of the island, and is surrounded by a white enclosure.

Approximate position on chart No. 2597, lat. 2° 22′ 50″ S., long. 105° 45′ 35″ E.

SOUTH PACIFIC—SOLOMON ISLANDS—GUADALCANAR—NORTH-WEST COAST.

Shoals in Coughlan harbour approach.

THE British Admiralty has given notice (No 453 of 1893) of the existence of the undermentioned shoals lying in the approach to Coughlan harbour from the north-west:—

(*a*) A coral shoal, about 200 yards long in a north-east and south-west direction, and 80 yards broad, with 5 fathoms water on it, lies with the west extreme of Guadalcanar island, bearing S. 11° W., distant 5 miles, and Levalea islet, N. 73° W.

Approximate position, lat. 9° 14′ 30″ S., long. 159°35′ E.

(*b*) Three patches, with estimated depths of 6 fathoms on them, were seen about 4 cables north-west of Sow and Pig reefs, and lying parallel with them. The note on the plan of Coughlan harbour has therefore been altered from "estimated depth about 10 fathoms" to "about 6 fathoms."

PAVUVU (RUSSELL) ISLANDS.

Shoal southward of Allacou islet.

Also, of the existence of a shoal, about 100 yards in length north-west and south-east and 50 yards in breadth, with an estimated depth of 5 fathoms over it, lying with the west extreme of Allacou islet, bearing N. 7° E., distant 1½ miles.

Approximate position, lat. 9° 9′ 45″ S., long. 159° 2′ 30″ E.

SOUTH PACIFIC—SOLOMON ISLANDS—GUADALCANAR—NORTH-WEST COAST.

Shoals in Coughlan harbour approach.

THE British Admiralty has given notice (No 453 of 1893) of the existence of the undermentioned shoals lying in the approach to Coughlan harbour from the north-west:—

(*a*) A coral shoal, about 200 yards long in a north-east and south-west direction, and 80 yards broad, with 5 fathoms water on it, lies with the west extreme of Guadalcanar island, bearing S. 11° W., distant 5 miles, and Levalea islet, N. 73° W.

Approximate position, lat. 9° 14′ 30″ S., long. 159°35′ E.

(*b*) Three patches, with estimated depths of 6 fathoms on them, were seen about 4 cables north-west of Sow and Pig reefs, and lying parallel with them. The note on the plan of Coughlan harbour has therefore been altered from "estimated depth about 10 fathoms" to "about 6 fathoms."

PAVUVU (RUSSELL) ISLANDS.

Shoal southward of Allacou isle'.

Also, of the existence of a shoal, about 100 yards in length north-west and south-east and 50 yards in breadth, with an estimated depth of 5 fathoms over it, lying with the west extreme of Allacou islet, bearing N. 7° E., distant 1½ miles.

Approximate position, lat. 9° 9′ 45″ S., long. 159° 2′ 30″ E.

Regarding the shifting of the Western Lump buoy, Rangoon river.

THE Deputy Conservator of the Port, Rangoon, has given notice, that the Western Lump buoy has been removed and relaid about 600 feet E.N.E. of its former position, in 21 feet reduced. This covers all encroachments, and the Spit channel is now perfectly safe.

The least water between the Centre Spit and Western Lump buoys is 16 feet reduced, and between the Western Lump and Upper Spit buoys is 18 feet reduced, and it deepens immediately outside.

CHINA —Yellow sea.

Pe Chili strait—Kwan Tung peninsula.

Double flashing light on Liau Ti Shan promontory.

With reference to Notice to Mariners No. 184, dated 15th October 1892, issued by this office, the British Admiralty has given further notice (No. 493 of 1893) that on 7th August 1893 the permanent light was exhibited from a light-house recently erected on the south-west slope of Liau ti Shan (Lao t'ieh Shan) promontory, south coast of Kwan Tung peninsula:—

Liau ti Shan light is a *double flashing white* light, showing flashes at intervals of *half a minute*, and visible between the bearings (approximate) of S. 8° E., through east and north, and N. 73° W., except where obscured by outlying islands. It is elevated 315 feet above the sea, and should be seen in clear weather from a distance of 25 miles.

The illuminating apparatus is dioptric of the first order.

The light-house, 52 feet high, constructed of iron and cylindrical in shape, is, with the dwellings and boundary wall, coloured white.

Approximate position: lat. 38° 43′ 15″ N., long. 121° 8′ 15″ E.

[First Publication.]

INDIA, SOUTH—CEYLON, SOUTH-EAST COAST.

Sunken rock reported north-east of Little Basses.

THE British Admiralty has given notice (No. 499 of 1893) that the British S.S. *Capella* (drawing about 22¼ feet water) touched slightly on a sunken rock or other obstruction, lying with Little Basses light-house, bearing about S. 52° W., distant 3 miles.

Position, to be considered doubtful, lat. 6° 26½′ N., long. 81° 46¼′ E.

The above information requires verification; but as the neighbourhood of the Basses is rocky, and has only been partially examined, and currents are often strong and variable in direction, it is advisable to steer a course to pass well outside them. A note to this effect has been placed on chart No. 813.

THE following Notice to Mariners, issued by the Vice-Admiral Commanding the Naval Forces in Neth: India, No. 31, dated 12th October 1893, is republished for general information:—

The Commander of H. N. M. Surveying vessel *Melvill van Carnbee* reports to have erected for the use of the survey the two undermentioned temporary beacons in the fairway to *Brouwer* strait:—

(a) In lat. 1° 52′ 40·5″ S., long. 101° 56′ 6″ E. in 4½ fathoms at low water, a beacon surmounted by a white truncated cone and a red flag, 27 feet above the sea.

(b) In lat. 1° 46′ 17″ S., long. 101° 57′ 34″ E., in 3½ fathoms at low water, a beacon surmounted by a white truncated cone and a flag, being blue and white in horizontal stripes, 45 feet above the sea.

This notice affects the charts: Nederlandsch Oost-Indie, blad I, 1867; Zuidelijk gedeelte Chineesche Zee, blad I, 1893, and Oostkust Sumatra, van de Boenja-banken tot de Karimon eilanden.

MALACCA—SINGAPORE.

Time signals on fort Canning and Pulo Brani.

NOTICE is given that time signals have been established on fort *Canning*, north-westward of *Singapore* road, and on *Pulo Brani, Singapore* "*New harbour.*"

Each signal consists of a ball, which is hoisted as preparatory at 0h. 55m. 0. s. p. m. and dropped daily (Sundays excepted) at 1h. 0m. 0s., *Singapore Observatory* mean time, equivalent to 18h. 4m. 34·95s. *Greenwich* mean time.

Should either signal fail, the ball that has not fallen will be dropped by hand at about 5 minutes past 1h., but this signal cannot be relied on for time.

Position, *Observatory*, fort *Fullerton*, lat. 1° 17′ 13·5″ N., long. 103° 51′ 15·7″ E.

(Notice to Mariners, No. 418, London, 1893.)

This notice affects the charts: Nederlandsch Oost-Indie, blad I, 1867; Zuidelijk gedeelte Chineesche Zee, blad I, 1893, and Riouw en Linga Archipel, blad I, 1891.

CHINA —Yellow sea.

Pe Chili strait—Kwan Tung peninsula.

Double flashing light on Liau Ti Shan promontory.

With reference to Notice to Mariners No. 184, dated 15th October 1892, issued by this office, the British Admiralty has given further notice (No. 493 of 1893) that on 7th August 1893 the permanent light was exhibited from a light-house recently erected on the south-west slope of Liau ti Shan (Lao t'ieh Shan) promontory, south coast of Kwan Tung peninsula :—

Liau ti Shan light is a *double flashing white* light, showing flashes at intervals of *half a minute*, and visible between the bearings (approximate) of S. 8° E., through east and north, and N. 73° W., except where obscured by outlying islands. It is elevated 315 feet above the sea, and should be seen in clear weather from a distance of 25 miles.

The illuminating apparatus is dioptric of the first order.

The light-house, 52 feet high, constructed of iron and cylindrical in shape, is, with the dwellings and boundary wall, coloured white.

Approximate position : lat. 38° 43′ 15″ N., long. 121° 8′ 15″ E.

INDIA, SOUTH—CEYLON, SOUTH-EAST COAST.

Sunken rock reported north-east of Little Basses.

THE British Admiralty has given notice (No. 499 of 1893) that the British S.S. *Capella* (drawing about 22¼ feet water) touched slightly on a sunken rock or other obstruction, lying with Little Basses light-house, bearing about S. 52° W., distant 3 miles.

Position, to be considered doubtful, lat. 6° 26½′ N., long. 81° 46¼′ E.

The above information requires verification; but as the neighbourhood of the Basses is rocky, and has only been partially examined, and currents are often strong and variable in direction, it is advisable to steer a course to pass well outside them. A note to this effect has been placed on chart No. 813.

[First Publication.]

CHINA SEA—STRAIT OF MAKASSAR.

Shoals northwestward of Balabalágan or Little Paternoster islands.

THE British Admiralty has given notice (No. 519 of 1893) of the existence of the following shoals near the north-west end of Balabalágan or Little Paternoster islands:—

1. A shoal, with depths of 4 to 5 fathoms on it, and 4 miles in length north and south, has the least water near its southern edge, situated approximately in lat. 2° 8′ S., long. 117° 1′ E.

2. A ridge of reef, awash at low water, commences 2 miles southward of the above shoal.

3. Many shoal spots, with depths of 6 to 7 fathoms on them, are situated eastward of 1 and 2. The least water found, 3 fathoms, lies with Ambungie (Karang Tiga), bearing S.S.E. ½ E. (S. 25¼° E.), distant about one mile, or approximately in lat. 2° 3½′ S., long. 117° 16′ E.

EASTERN ARCHIPELAGO—MALACCA STRAIT.

Temporary beacons in the fairway to Brouwer strait.

THE following Notice to Mariners, issued by the Vice-Admiral Commanding the Naval Forces in Neth: India, No. 31, dated 12th October 1893, is republished for general information:—

The Commander of H. N. M. Surveying vessel *Melvill van Carnbee* reports to have erected for the use of the survey the two undermentioned temporary beacons in the fairway to *Brouwer* strait:—

(*a*) In lat. 1° 52′ 40·5″ S., long. 101° 56′ 6″ E. in 4½ fathoms at low water, a beacon surmounted by a white truncated cone and a red flag, 27 feet above the sea.

(*b*) In lat. 1° 46′ 17″ S., long. 101° 57′ 34″ E., in 3½ fathoms at low water, a beacon surmounted by a white truncated cone and a flag, being blue and white in horizontal stripes, 45 feet above the sea.

This notice affects the charts: Nederlandsch Oost-Indie, blad I, 1867; Zuidelijk gedeelte Chineesche Zee, blad I, 1893, and Oostkust Sumatra, van de Boenja-banken tot de Karimon eilanden.

MALACCA—SINGAPORE.

Time signals on fort Canning and Pulo Brani.

NOTICE is given that time signals have been established on fort *Canning*, north-westward of *Singapore* road, and on *Pulo Brani, Singapore* "*New harbour.*"

Each signal consists of a ball, which is hoisted as preparatory at 0h. 55m. o. s. p. m. and dropped daily (Sundays excepted) at 1h. 0m. 0s., *Singapore Observatory* mean time, equivalent to 18h. 4m. 34·95s. *Greenwich* mean time.

Should either signal fail, the ball that has not fallen will be dropped by hand at about 5 minutes past 1h., but this signal cannot be relied on for time.

Position, *Observatory*, fort *Fullerton*, lat. 1° 17′ 13·5″ N., long. 103° 51′ 15·7″ E.

CHINA —Yellow sea.

Pe Chili strait—Kwan Tung peninsula.

Double flashing light on Liau Ti Shan promontory.

With reference to Notice to Mariners No. 184, dated 15th October 1892, issued by this office, the British Admiralty has given further notice (No. 493 of 1893) that on 7th August 1893 the permanent light was exhibited from a light-house recently erected on the south-west slope of Liau ti Shan (Lao t'ieh Shan) promontory, south coast of Kwan Tung peninsula:—

Liau ti Shan light is a *double flashing white* light, showing flashes at intervals of *half a minute*, and visible between the bearings (approximate) of S. 8° E., through east and north, and N. 73° W., except where obscured by outlying islands. It is elevated 315 feet above the sea, and should be seen in clear weather from a distance of 25 miles.

The illuminating apparatus is dioptric of the first order.

The light-house, 52 feet high, constructed of iron and cylindrical in shape, is, with the dwellings and boundary wall, coloured white.

Approximate position: lat. 38° 43′ 15″ N., long. 121° 8′ 15″ E.

SOUTH PACIFIC OCEAN—ROTUMAH ISLAND.

Shoals westward of Chilinha point and south-westward of Atana islands.

NOTICE to Mariners, No. 538 of 1893, issued by the British Admiralty, is republished. The following information has been received from H.M.S. *Rapid* :—

1. A shoal, with a depth of 9 feet on it, circular in shape and about a cable in diameter, lies about three-quarters of a mile westward of Chilinha point, the west extreme of Rotumah.

   Position, to be considered doubtful, lat. 12° 29′ 30″ S., long. 176° 59′ 30″ E.

2. A shoal is reported to extend about 4 miles south-westward from the Atana islands, westward of Rotumah; with a rock, on which the sea does not break, situated on the shoal about 2 miles from the islands. The distance to which the shoal extends from the islands is not known, and it may be found to be further than 4 miles.

AUSTRALIA—PORT ADELAIDE RIVER.

Alteration in the position of No. 12 and Red light beacons.

THE following Notice to Mariners (No. 8 of 1893), issued by the Secretary, Marine Board, Port Adelaide, is republished for general information:—

Masters and pilots of vessels navigating the port river are hereby informed that No. 12 light beacon has been moved 400 feet in a S.-W. direction from its previous position and placed on the edge of the channel.

The Red light beacon has been moved 200 feet southward, on a line drawn from No. 11 to the Ocean Steamers' mooring buoy.

The Red light in line with No. 12 leads through the centre of the outer cutting as heretofore.

Date of exhibition of light on Dajang-Dajangan islet.

WITH reference to Notice to Mariners (No. 261, dated 10th ultimo), issued by this office, the following further notice (No. 34, dated 20th November 1893), issued by the Vice-Admiral Commanding the Naval forces in Neth.-India is republished for general information:—

With reference to Notice to Mariners, No. 30, Batavia, 1893, notice is given that the beacon light on *Dajang-Dajangan* islet has been exhibited on the 16th November last.

The light, shown from a framework iron support, is a *fixed white* light of the fifth order. It is elevated 63·3 feet above high water, and should be visible from a distance of 14 miles in all directions, except where obscured by *Tanna-Kéké* islet. It will, however, be visible over the lower parts of this islet.

The light-house 67·7 feet above high water, and the stone watch-house with red roof are painted white.

Approximate position, lat. 5° 23′ 38″ S., long. 119° 10′ 26″ E.

BOOKS.									
Feb. 25th	93	12mo dy	1st...	1,000	ditto ...	0 8 0	Sharat Kumár Sen, 89, Ahiritolá Street, Calcutta.	Teaching music without a master.	1303
Jan. 22nd	60	12mo dy	1st...	1,000	ditto ...	0 4 0	Jogendra Náth Sarkár, 217, Cornwallis Street, Calcutta.	Kabir was the greatest reformer of the fourteenth century, and he struck a severe blow on idolatry, blind adherence to the Shastras, and to the *guru*. The *donhás* given here are mostly from his celebrated work the Bijaka.	1304
" 2nd	208	12mo dy	1st...	1,000	ditto ...	0 12 0	Kálí Sankar Sukul, 11, Patuatolá Street, Calcutta.	An account of Abraham Lincoln, the President of the United States. He came to supreme power at a time when the United States were on the eve of a Civil War. He succeeded in bringing the Civil War to an end, and in abolishing slavery. The secret of his sucess, the author says, was his faith in God, and his belief in Providence.	1305
Nov. 8th	123	8vo ...	1st...	500	ditto ...	......	......	An appreciative account of the Great Buddhist King Asoka of the Maurya dynasty. To this work has been added in the form of an appendix, a drama on the subject of the blinding of Kunála, one of the most touching incidents in the history of the family of Asoka.	1306
Jan. 22nd	190	......	1st...	500	ditto ...	1 0 0	Brahmo Mission Office, 20, Patuatola Lane, Calcutta.	Contains the history of his breach with the Adi Brahmo Samáj, of the establishment of the Indian Brahmo Samáj, and of his preaching in various parts of India.	1307
Dec. 3rd	90	12mo dy	1st...	1,000	ditto ...	0 2 0	......	Andrew Fuller was one of the great projectors of the scheme of foreign missions. It was by his endeavours that the Baptist Missionaries were first sent out to India.	1308
" 31st	194	12mo dy	1st...	1,000	ditto ...	1 4 0	Lalit Mohan Adhikárí, Pabna.	A Bengali translation of Shakespeare's Hamlet.	1309
Feb. 15th	130	12mo dy	2nd...	1,000	ditto ...	1 0 0	Matíndra Náth Mukharji, 18, Bánstolá Lane, Calcutta.	Noticed	1310
Jan. 8th	60	8vo dy	1st...	1,000	Printed	0 4 0	......	A farce designed to ridicule the sea-voyage movement. The play-wright has used very strong language to many of the leaders of the movement. He wants the public to believe that these are fussy fellows, who run after every new agitation, and are utterly devoid of sincerity of purpose.	1311

" 7th	28	12mo dy	1st...	250	ditto ...	0 2 0	Brahmo Mission Office, 20, Patuatolá Lane, Calcutta.	Gives a clear, lucid and brief account of the religious tenets of the great leaders of the Brahmo Somaj, namely, Rájá Rámmohan Ráy, Babu Devendra Náth Tagore, and Babu Keshab Chandra Sen. Keshab Chandra united in a harmonious whole, the catholicity of Rámmohan and the particularity of Devendra Náth.	1446
Dec. 1st	...	8vo dy	1st...	1,500	ditto ...	1 8 0	Matilál Ghosh, 2, Ananda Chatterji's Lane, Calcutta.	An account of Chaitanya's life from his early childhood to the time of the conversion of Jagái and Mádhái. The materials have been collected from many ancient works, but chiefly from that by Balarám Dás, a disciple of Narottam Dás. The author thinks that he is the same person as Balarám Dás. Balarám seems to have utilized much of the diary by Murári Gupta, one of the first disciples of Chaitanya. That diary is now lost.	1447
Jan. 4th	77	12mo dy	1st...	1,000	ditto ...	0 2 0	......	This is a prize essay in memory of the late Rev. Henry Williams. The work treats of the life and preachings of Chaitanya, and ends with a declaration that christianity is the only true religion.	1448

1893.	Pages.					Rs. A. P.			
Feb. 1st	204	8vo dy	1st...	1,000	Printed	4 0 0	Tárá Prasanna Banerji, M. A., B. L.	Refers to the property of male and female owners with charts, tables of heirs and copious notes of cases, supplemented by appendices, containing acts and leading cases bearing upon the subject.	2884
Jan. 25th	785	8vo rl	1st...	500	ditto ...	10 0 0	Bámápada Mukharji, 39, South Chakrabere Road, Bhawanipur.	Containing reports of cases decided by the superior Courts in India and by Her Majesty's Privy Council.	2885
Feb. 14th	176	8vo dy	1st...	500	ditto ...	1 0 0	Rám Gopál Sányál, 23, Doctor's Lane, Calcutta.	The title explains the object of the work.	2886
1892. Dec. 30th	260	8vo dy	1st...	1,000	ditto ...	2 0 0	S. D. Roy, Magistrate, Sealdah Police Court.	For the covenanted, police, and other executive services under the Government of Bengal.	2887
1893. Jan. 18th	71	16mo...	2nd...	600	ditto ...	1 0 0	G. Toynbee, B. C. S.	The work has been prepared to meet what is believed to be a want much felt by district and other Magistrates, District Superintendents of Police and their subordinates.	2888
" 12th	36	8vo dy	New	1,000	ditto ...	0 4 0	J. M. Sen & Co.	The Queen *versus* Hirá Lál Sil tried in 1872.	2889
1892. Dec. 28th	209	8vo dy	1st...	1,000	ditto ...	2 0 0	Kavirâj Rasik Lál Gupta, 103, College Street, Calcutta.	An attempt to compile in a handy volume all that is good in the whole range of Hindu medical science.	2890
Nov. 21st	32	8vo rl	1st...	1,000	ditto ...	20 0 0 for the complete work.	Avinásh Chandra Kaviratna.	With notes ...	2891
" 15th	18	8vo crown.	1st...	......	ditto ...	......	K. A. Birch, Principal, Medical College, Calcutta.	Instructions regarding surgical dressings and cases.	2892
" 2nd	83	8vo rl	1st...	1,050	ditto ...	2 0 0	......	Statistical tables, 1890 ...	2893
" 18th	18	8vo dy	...	200	ditto ...	0 4 0	......	An examination of some of the returns.	2894
1893. Feb. 17th	[illegible]	8vo dy	1st...	500	ditto ...	1 0 0	E. B. Watson, Jubbulpore.	At home, in the jungles, or the colonies' without the use of hops, brewers' yeast, toddy or baking powders.	2895
1892. Nov. 29th	56	12mo dy	1st...	1,100	ditto ...	0 4 0	Hem Chandra Baruá, Gauhati, Assam.	The Author has confined himself to the principal formulas gone through at the nuptials both of Hindus and of the aboriginal tribes inhabiting Assam.	2896
......	22	8vo dy	1st...	100	ditto ...	......	Jogendra Chandra Ghosh.	Read before the meeting of the Indian Positivists held in Calcutta on the Positivist *Mahálayá* or festival of all the dead. The writer thinks that Eastern ethics has run off into mendicancy and suicide; Western ethics into competition and depopulation.	2897
1893. Jan. 10th	24	8vo dy	1st...	500	ditto ...	......	......	The writer defines what technical education means, and the condition of that education in European countries. He says that the attitude of Bengal on the subject is one of complete indifference and Government should introduce it in that country. It would then bring about *not Utopia* certainly, but a new state of things with enhanced material prosperity with new spheres of activity opening for the people.	2898

BOOKS—*contd.*									
1893.	Pages.					Rs. A. P.			
Mar. 1st	64	12mo dy	1st...	500	Printed	......	Amarendra Náth Datta, 139, Cornwallis Street, Calcutta.	A love piece, in which the god and goddess of Love, the Dawn, the Vesper are the principal characters. The scenes are painted with some power. Dawn is represented as a Princess, who gets married to Vesper, a prince of pure birth.	1494
Apl. 2nd	136	12mo dy	1st...	1,000	ditto ...	0 8 0	The author, 108, Upper Chitpur Road, Calcutta.	Some of the valiant deeds of the late dacoit, Tantia, are well adapted for dramatic representation. The scene of his capture has been delineated with some power. An attempt has been made to cast a halo round the Bhil dacoit and to represent him as the Robin Hood of old.	1495
Mar. 20th	32	12mo dy	1st...	1,000	ditto ...	0 4 0	Atul Krishna Mitra and Nimái Charan Basu.	Pramod and Amod are brothers. They live happily, and are married. Their wives are greatly attached to them, and wife Lilá, who does all in her power to dissuade him from such madness. But he is inexorable. Lalitá, his wife by the miraculous power of Lílá they remain in this world, and love each other tenderly.	1496
Mar. 1st	128	12mo rl	1st...	500	ditto ...	0 12 0	Rámlál Banerji, Bhawanipur.	A sensational drama largely interspersed with exquisite songs. The King of Kánchi laid siege the Princess of Champá. But their fathers would not allow their union; so each of them leaves the capital. the sea. Rati, the Goddess of Love, rescues the dead body of Kamalá from the sea, and throws a garland of body of Anil who also is revived by a touch of the garland. Then their fathers are reconciled to each	1497
May 10th	218	12mo...	1st...	1,000	ditto ...	0 8 0	Dína Náth Sányál, Jessore.	The story of a wicked man, born of a respectable family. He took a delight in deceiving others; but there was a method excite laughter. Once on a time he stole away an image of Shítalá, the Goddess of small-pox, and buried Goddess gave him to understand that she was there. The place was excavated and the image was discovered.	1498
Feb. 19th	134	12mo...	1st ...	1,000	ditto ...	0 12 0	Bhavání Charan Ghosh, Tangail.	Contains a number of well written short stories of marriage and married life. The object of the writer seems to be to point out being chosen by the father of the boy. In this instance the father forces marriage on an unwilling young man, would not allow the daughter in-law to enter into his house and this made himself and his whole family	1499
Feb. 20th	188	12mo ...	2nd...	1,000	ditto ...	1 0 0	The author, 5, Srináth Dás' Lane, Calcutta.	A revised and improved edition of Bengali book No. 5961, noticed in the Catalogue for the first quarter of the year 1887.	1500
April 10th	106	12mo rl	1st...	10,000	ditto ...	0 8 0	Hárán Chandra Rakshit, Mazilpore, 24-Parganas.	The conception of the story and the development of the plot show considerable power in the writer, but the book is full of disgusting details of the most revolting sort of crimes. The conception of the deformed creature *Tribakra*, who, owing to his deformity, was a great misanthrope and who had tender feelings only for one soul, his daughter, appears to be original, and it has been developed with art.	1501
April 24th	95	12mo dy	1st ...	500	ditto ...	......	......	The story of Nílámbar Sil, an inhabitant of Chinsura who, in the early years of British rule in Bengal, helped the Government with money. The work gives much interesting information about the Mahratta raids in Bengal, from 1742 to 1752 and about the social condition of Sonar Banias at the time.	1502
May 14th	166	8vo cr. s	1st ...	1,000	ditto ...	0 5 0	Púrna Chandra Ráy and others, Simla.	A translation of Reynolds' well-known work of the same name.	1503
Mar. 15th	182	12mo dy	1st...	1,000	ditto ...	1 0 0	Svarna Kumárí Deví.	The first part of this work has been noticed as No. 9540 (Bengali books) of the Catalogue for the second-quarter of the year 1890. this book has been delineated the silent sufferings of a virtuous young widow at her father's, at her father-in- which her good name is soiled.	1504
„ 16th	100	12mo dy	1st...	1,000	ditto ...	0 4 0	Durgádás Láhiri 8, Tamer's Lane, Calcutta.	The same immoral story with all its disgusting details is continued from Bengali book No. 1328 of the Catalogue for the first-quarter of the year 1893, relieved in this part by the appearance of a virtuous lady, who helps every one in his distress, without a single thought of what the early life of the man may have been.	1505

1893.	Pages.					Rs. A. P.			
Mar. 2nd	144	12mo dy	1st...	1,000	ditto ...	0 8 0	Dvárkánáth Basu, 21, Shib Náráyan Dás's Lane, Calcutta.	Contains a long alphabetical list of proverbs in Bengali, with a short essay on the character of the nation as revealed in these proverbs.	1591
„ 21st	116	12mo dy	2nd...	1,000	ditto ...	0 6 0	Priyanáth Chakravartí, 255, Upper Chitpur Road, Calcutta.	A beautiful allegory in which devoted attachment to God is symbolised under the form of wine.	1592
„ 5th	27	12mo...	1st...	250	ditto ...	0 2 0	Brahmo Mission Office, 20, Patuatolá Lane, Calcutta.	The first stage of ancient *yoga* is indifference to worldly pleasure and pain, the second stage is the habit of enquiring into the nature of things, to know what they really are. At this stage people come to know the evanescent and illusive character of the world, and then they begin to meditate on God. But the new *yoga*, first taught by Rája Rám Mohan Ráy, commences with the meditation of God, which gradually destroys the notion of *ego* and merges the man into God.	1593
Feb. 26th	52	12mo dy	1st...	3,000	ditto ...	0 2 6	Paramánanda Sen Gupta, Mániktalá.	Songs expressive of devotion to Hari.	1594
Mar. 25th	128	8mo dy	1st ...	1,000	ditto ...	2 0 0	Shashibhúshan De, 344, Upper Chitpur Road, Calcutta.	Contains lessons in agriculture, horticulture and the manufacture of various articles.	1595
April 16th	14	D. F.	1st ...	1,000	ditto ...	0 0 6	The Author, Rámnagar, N. B. Railway.	The distinction of caste is not to be found in nature, and in the vedas, and yet some people are defending it by quoting shástras. The writer denounces these men and their theory.	1596
Mar. 22nd	12	12mo dy	4th ...	1,000	ditto ...	0 1 0	......	The nature of *Bául* songs have often been explained.	1597
„ 22nd	12	12mo dy	4th ...	1,000	ditto ...	0 1 0	......	The first song is on the Mymensingh case of Rájá Suryya Kánta Acháryya Chaudhurí.	1598
April 8th	30	12mo dy	1st ...	1,000	ditto ...	0 2 0	Amarnáth Datta, Keshabpur.	Songs celebrating the early sports of Krishna at Brindában.	1599
Mar. 29th	144	12mo dy	1st ...	500	ditto ...	0 5 0	Uttamá Sundarí Deví, Dacca.	Most of the songs are on religious or esoteric subjects, to the tune made famous by Rám-Prasád in the last century. It is the wife of the poet who publishes these songs.	1600
April 20th	407	16 mo	1st ...	1,050	ditto ...	1 12 0	Ravíndranáth Tagore, Jorasanko.	The Válmíki Pratibhá is one of the best dramas in Bengali. This volume contains a very large number of songs by Babu Ravíndranáth Tagore, a rising poet and a novelist.	1601
May 10th	104	12mo dy	1st ...	1,000	ditto ...	0 8 0	Bipin Bihárí De, 104, Beadon Street, Calcutta.	The illustrations are poor, and the metrical letters not better.	1602
April 10th	36	12mo dy	1st ...	1,000	ditto ...	......	The Author, Beauleah.	The writer stands against the pretensions of the Vaidya caste to *Vaishyahood*, and says the Vaidyas are a mixed caste, produced by the intermixture of various castes. Rájá Rájballabh made an attempt to raise their caste status during the last century.	1603
Apl. 14th	17	8vo dy	1st...	250	ditto ...	Nil ...	Govinda Mohan Ráy Kákiná, Rangpur.	....	1604

1893.	Pages.					Rs. A. P.			
April 21st	96	12mo dy	1st...	1,000	Printed	0 4 0	Bhuban Chandra Kar, Dum Dum.	Designed for the use of Primary Schools.	1620
„ 30th	12	12mo dy	1st...	300	ditto ...	0 1 0	Durgá Dás Datta, Keshabpur.	Short pieces on a variety of subjects.	1621
May 22nd	36	12mo dy	1st...	500	ditto ...	0 2 0	Kunjalál Ráy, 14, Rám Kánta Basu's Street, Calcutta.	Short poems on various subjects.	1622
„ 11th	187	16mo ...	1st...	1,000	ditto ...	0 8 0	The author, 203-2, Cornwallis Street, Calcutta.	Laments of Sítá in the lonely hermitage of Válmíki while reciting to a *Tápasi*, the events of her life, *i.e.*, the breaking of the bow by Ram; the coronation of Ram; her abduction by Rávan, her confinement in his Asoka garden, and lastly her union with Ram in the forest of Naimisha.	1623
1892. May 10th	24	12mo dy	1st...	250	ditto ...	0 1 0	Rájá Shashi Shekhareshvara Ráy.	Short pieces on morality and other subjects, reprinted from the *Shilpa O Krishi Patriká*. The publisher says that a pirated edition of these pieces was published from East Bengal in which many of the pieces were mutilated. Hence it has become necessary to reprint them.	1624
1893. Mar. 16th	20	16mo dy	1st...	500	ditto ...	0 2 0	......	Nág is one of the septs of the Káyastha caste. One of this family abused the power entrusted to him under the Local Self Government Act, and the poet satirizes him as one belonging to *Nágas* or serpents, as the word Nága also means a serpent.	1625
Feb. 27th	34	12mo dy	1st...	500	ditto ...	0 5 0	Hari Charan Sarkár, Durgápur, Faridpur.	Laments of a bereaved husband for the loss of his wife.	1626
Mar. 1st	44	12mo dy	1st...	1,000	ditto ...	0 4 0	......	Laments of a lover for the loss of his beloved.	1627
„ 8th	72	12mo dy	1st...	600	ditto ...	0 6 0	Narendra Náth Barál, 2, Sanátan Sil's Lane, Calcutta.	Complains that the great national festival of Durgá Pujá has now degenerated into a mere formal religious observance without the spirit of devotion which led the ancestors of the Hindus to invest it with all the solemnity of a real worship.	1628
April 25th	36	8 vo ...	1st...	1,000	ditto ...	0 2 0	......	Contains short pieces on a variety of subjects, mostly moral and religious.	1629
„ 11th	14	12mo dy	1st...	790	ditto ...	0 0 6	Miyan Muqbul Ali, Baralea Station, Patiya, Chittagong.	Short pieces on morality and various other subjects, and contains an appeal to the Musulmans to rouse themselves into activity from their present lethargy.	1630
1892. May 13th	17	12mo dy	1st...	1,000	ditto ...	0 1 6	Prasanna Náth Sarma Chaudhuri.	A short piece on the hardship of a servant's life.	1631
